Save money on your energy bill with one simple phone call

The rumours are true.

Your energy company now has to give you their 'best offer'.

Here's some **good news**. You might have started to notice the words **'could you save money on another plan?'** appear on your energy bill. This isn't a marketing ploy. It's a Victorian Government **requirement**. Energy companies are now responsible for giving you the **cheapest plan available**.

Call your energy company today and ask for their 'best offer'. **It could save you money.**

If you are confused about energy plans, you can simply ask your energy company for the Victorian Default Offer – this is **a fair price** for electricity, set by the government.
